3.3 Minimum Call Completion Rate

Customers can expect a call completion rate of 98% during peak use periods for all Feature Group D Equal Access 1+ Services. The call completion rate is calculated as the number of calls completed (including calls completed to a busy line or to a line which remains unanswered by the called party) divided by the number of calls attempted.

3.4 Timing of Calls

Long distance usage charges are based on the actual usage of the Company's network. Usage begins when the called party picks up the receiver. When the called party picks up timing is determined by hardware answer supervision. Chargeable time ends when either party "hangs up" thereby releasing the network connection. The Company does not bill for uncompleted calls.

3.5 Service Area

The Service area of the Company includes all Equal Access points in Wyoming.

6.7 T1 Service (1.544 mbps)

T1 is a digital transmission link with a total signaling speed of 1.544 mbps that can be provided as a channelized Service for separate voice or data channels or as an unchannelized raw bit stream. The unchannelized Service provides 1.536 mbps that can be split up anyway the Customer chooses. In network access applications, a T1 can also be used for private line networking.

T1 Service will only be offered where technically feasible or where network facilities are available. In other instances, T1 Service will be offered on an Individual Case Basis (ICB).

6.8 Primary Rate Interface (PRI)

The basic Primary Rate Interface (PRI) structure consists of 23 B-channels and a D channel, for a total transmission rate of 1.544 Mbps, which is equivalent to a T1 facility. Each 64 kbps B-channel carries user information such as voice calls, circuit-switched data, or video. The D-channel is a 64-kbps channel that is used to carry the control or signaling information.

Circuit-Switched Data Primary Rate Interface consists of 23B+D, which is equivalent to a T1 facility. The Customer may use Customer's Premise Equipment to bond together 64 kbps B-channels for the transmission of circuit-switched data or video.

Primary Rate Interface may have the following Service Configurations:

- A. 23B+D: This Service configuration provides for 23 B-channels and 1 D-channel. The B-channels carry user information such as voice calls, circuit-switched data, or video while the D-channel handles signaling information. When equipped, the D-channel can control a maximum of 479 B-channels. The B-channels may be provisioned on the same facility as the D-channel or on other PRS T1 facilities.
 - B. 24B: This Service configuration provides for 24 B-channels. The B-channels carry user information such as voice calls, circuit-switched data, or video. The signaling information is provided by a D-channel on the first T1 facility.
 - C. 23B+Back-up D: This Service configuration provides for 23 B-channels and a back-up D-channel. The back-up D-channel is used if the primary D-channel, which provides signaling for multiple T1 facilities, fails. Active calls are not maintained during the switch-over to the back-up D-channel. PRI Service will be offered where technically feasible or where network facilities are available. In other instances, PRI Service will be offered on an Individual Case Basis (ICB).

6.9 Rates for Dedicated Access Services

6.9.1 General

Nonrecurring and monthly recurring rates apply for each Digital Transmission Service furnished by the Company. Monthly recurring rates vary according to the time period for which the Customer commits to take the Service. Unless otherwise noted, these standard rate elements are used in calculating the monthly recurring rate for each Service:

- A. Interoffice Channel Mileage-Fixed: This rate element applies per digital channel whenever there is mileage associated with the channel; a digital channel has mileage associated with it when the endpoints of the channel are located in geographic areas normally served out of separate Customer premises or the Customer premise and the Company MegaPop. This rate element applies per circuit.
 - B. Interoffice Channel Mileage-Per Mile: This rate element applies whenever there is mileage associated with the digital channel. The unit rate is multiplied by the number of miles (Interoffice Mileage) between the two Customer premises or the Customer premise and the Company MegaPop. Fractions of a mile are rounded up to the next whole mile before rates are applied.
